

International Higher Education is the quarterly publication of the Center for International Higher Education.

The journal is a reflection of the Center's mission to encourage an international perspective that will contribute to enlightened policy and practice. Through *International Higher Education* a network of distinguished international scholars offer commentary and current information on key issues that shape higher education worldwide. *IHE* is published in English, Chinese, and Russian. Links to all editions can be found at www.bc.edu/cihe.

The Arab Spring: The Higher Education Revolution That Is Yet to Happen

ANDRÉ ELIAS MAZAWI

André Elias Mazawi is professor in the Department of Educational Studies, Faculty of Education, University of British Columbia, Vancouver, British Columbia, Canada. He is also affiliate professor, at the Euro-Mediterranean Centre for Educational Research, University of Malta, Malta. E-mail: Andre.Mazawi@ubc.ca.

For let Philosopher and Doctor preach
Of what they will, and what they will not—each
Is but one Link in an eternal Chain
That none can slip, nor break, nor over-reach.
—Omar Khayyam (translated by Edward Fitzgerald)

The overthrow of the Tunisian and Egyptian rulers, following widespread demonstrations for regime change—subsequently, spreading from Algeria to Yemen, as well as to Libya, Syria, Jordan, and Bahrain—has raised hopes for a new political dawn across the Arab region. Likened to a “volcano” by some observers, protest movements call for new forms of citizenship and for the establishing of new bases of state legitimacy. Commentators refer to a long overdue “political spring.” Others invoke the notion of a “renaissance” or a renewed “Arab awakening.” Others, still, refer to a watershed of “revolutions” ushering in new forms of politics, attuned to questions of human rights and public participation. In response, reform initiatives have been frenetically introduced by ruling elites in their attempts to contain and navigate the ensuing legitimacy crisis. At this juncture, one wonders how do the unfolding political upheavals across the Arab region and the reform initiatives introduced by besieged ruling elites affect state–higher education relations more particularly?

HIGHER EDUCATION AND REGIME LEGITIMACY

Higher education institutions in the Arab region play a key role in upholding a regime’s self-projected image of benevolent rule. They provide access to educational credentials to younger generations of high school graduates, particularly those originating from less-established socioeconomic strata and who desperately seek entry into structurally confined labor markets. Equally, they secure stable civil-service jobs to academics and intellectuals, affiliated with the middle and middle-upper classes. The latter represent a mount-

ing political force, disposed to engage a range of political ideologies not always aligned with regime orthodoxy. Not least, they offer ruling elites a space from which they can recruit or co-opt state ministers, senior professional cadres, and policymakers from among the professoriate.

Ruling elites regulate appointments to leadership positions within higher education institutions. Some “reforms” were undertaken in view of limiting faculty and student participation in governance and containing opposition groups. For instance, in Egypt, law 142 of 1994 added deans to the list of senior university officials who are appointed by the minister of higher education. Consequently, university councils included members who were largely ministerial appointees, with little (if any) space left for nonappointed voices, such as faculty members and students.

CONTRADICTORY OR COMPLIMENTARY POLICY AGENDAS?

The state’s involvement in the political subordination of higher education occurs alongside policies that seek to realign higher education with labor market “needs,” through increased accountability and economic liberalization, in an attempt to foster innovative academic and administrative leadership capacities and improve governance. Egypt’s Higher Education Enhancement Project (funded by the World Bank), and Syria’s Quality University Management and Institutional Autonomy framework (as part of the European Union’s Tempus Project) are pertinent examples. Policymakers also invoke the low ranking of universities on international university lists as an additional “evidence” to justify higher education restructuring.

Thus, political subordination and economic liberalization feed on each other. On the one hand, the state’s political subordination of higher education institutions subverts the emergence of an authentic academic leadership and emphasizes authoritarian modes of decision making. On the other hand, reforms seeking to promote the economic contributions of higher education introduce layers of accountability and new conditions of academic work, without ensuring academic freedom or questioning existing authoritarian modes of governance. Viewed as part of the building of a so-called “Arab knowledge society,” liberalization reforms (part of fiscal restructuring schemes) introduce new forms of higher education provision—such as private, international, and for-profit institutions, in an attempt to create alternative options to state-sponsored higher education. This has been the case, for instance, in Tunisia, Egypt, Jordan, and the smaller Gulf Cooperation Council states—differences between these contexts notwithstanding.

Ruling elites and policymakers reconcile these ostensibly contradictory policy discourses by limiting discussions on higher education to issues associated with “human capi-

tal.” Emphasis is placed on measurable indicators of higher education performance, in terms of engaging labor markets, employability, and economic returns of graduates. At the same time, the political contexts under which higher education institutions may best thrive are neglected. Thus, questions pertaining to faculty and student participation in higher education governance, and their effects on the fostering of a research culture, are left entirely unattended—fuelling resentment, alienation, and disillusionment in relation to both the state and higher education institutions, alike. The subordination of higher education institutions further erodes the public respectability these institutions have traditionally enjoyed. It also lays bare—as sociologist M’hammed Sabour has shown in *The Ontology and Status of Intellectuals in Arab Academia and Society*—the marginality of the academic, who very often lacks the capacity “to speak truth to power” from within institutional platforms without risking the regime’s retaliation and reprisal.

It is not yet clear what configurations of state higher education relations would emerge out of the current political contestation.

With an overwhelming reliance of the Arab state on foreign consultancies and imported know-how, higher education institutions are further limited in their capacity to productively engage development challenges or contribute to the indigenization of knowledge through viable context-based approaches to research—particularly in the fields of the social sciences and education. Paradoxically, while the restructuring reforms preceding the current wave of regime contestation have expanded higher education opportunities beyond recognition, often over quite a brief period of time, these reforms have nonetheless exposed the reliance of both the state and higher education institutions on precarious visions of modernity and globalization.

RECONSTRUCTING HIGHER EDUCATION FROM WITHIN

It is not yet clear what configurations of state higher education relations would emerge out of the current political contestation. Nor is it clear whether and how the contestation witnessed so far would affect higher education governance more particularly. What is clear, however, is that for the generative capacities of higher education to flourish, both the state and civil-society groups and movements must

recognize that the political, cultural, and economic roles of higher education institutions cannot be approached separately.

What is equally clear is that academics need to turn their research tools inward, by critically unpacking the foundations of the higher education structures in which they work and by critically reflecting on their implication with state power. Such a critical engagement would help reclaim not only the centrality of academic work in development but would also connect the academic workplace with community engagement and social transformation. The prospects of this reclaiming are not solely contingent on governance reforms for greater faculty and student participation or on the overthrowing of despotic regimes, as important as these are. These outlooks are primarily contingent on the arduous struggle of academics involved in building an inclusive “knowledge culture” and in constructing a knowing self for whom the “capacity to aspire” and the capacity to differ are inalienable rights, which no regime nor other forms of power can “slip, nor break, nor overreach.” ■

Egyptian Private Higher Education at a Crossroads

DANIEL C. LEVY AND MANAR SABRY

Daniel C. Levy is distinguished professor and director of the Program for Research on Private Higher Education, State University of New York at Albany, Albany, NY. E-mail: dlevy@albany.edu. Manar Sabry has worked in international and Egyptian policy agencies. He holds a PhD from the University at Albany. E-mail: msabry@buffalo.edu.

IHE devotes a column in each issue to a contribution from PROPHE, the Program for Research on Private Higher Education, headquartered at the University at Albany. See <http://www.albany.edu/>.

The revolution that toppled the Mubarak regime opens the door to uncertain political, economic, and social futures. These futures will condition higher education outcomes. One important development to scrutinize is the fate of private higher education. Will the private sector see continued growth or be constrained by political populism or take some different course altogether? Revolutions have often been antithetical to private higher education.

THE CENTER FOR INTERNATIONAL HIGHER EDUCATION (CIHE)

The Boston College Center for International Higher Education brings an international consciousness to the analysis of higher education. We believe that an international perspective will contribute to enlightened policy and practice. To serve this goal, the Center publishes the International Higher Education quarterly newsletter, a book series, and other publications; sponsors conferences; and welcomes visiting scholars. We have a special concern for academic institutions in the Jesuit tradition worldwide and, more broadly, with Catholic universities.

The Center promotes dialogue and cooperation among academic institutions throughout the world. We believe that the future depends on effective collaboration and the creation of an international community focused on the improvement of higher education in the public interest.

CIHE WEB SITE

The different sections of the Center Web site support the work of scholars and professionals in international higher education, with links to key resources in the field. All issues of *International Higher Education* are available online, with a searchable archive. In addition, the International Higher Education Clearinghouse (IHEC) is a source of articles, reports, trends, databases, online newsletters, announcements of

upcoming international conferences, links to professional associations, and resources on developments in the Bologna process and the GATS. The Higher Education Corruption Monitor provides information from sources around the world, including a selection of news articles, a bibliography, and links to other agencies. The International Network for Higher Education in Africa (INHEA) is an information clearinghouse on research, development, and advocacy activities related to postsecondary education in Africa.

THE PROGRAM IN HIGHER EDUCATION AT THE LYNCH SCHOOL OF EDUCATION, BOSTON COLLEGE

The Center is closely related to the graduate program in higher education at Boston College. The program offers master's and doctoral degrees that feature a social science-based approach to the study of higher education. The Administrative Fellows initiative provides financial assistance as well as work experience in a variety of administrative settings. Specializations are offered in higher education administration, student affairs and development, and international education. For additional information, please contact Dr. Karen Arnold (arnoldk@bc.edu) or visit our Web site: <http://www.bc.edu/schools/lsoe/>.

OPINIONS EXPRESSED HERE DO NOT NECESSARILY REFLECT THE VIEWS OF THE CENTER FOR INTERNATIONAL HIGHER EDUCATION.
